## PROFESSIONAL SUMMARY

Motivated MCA graduate (June 2026) with strong practical knowledge of Python, Java, SQL, and modern application development. Hands-on experience developing, deploying, and maintaining web, mobile, and AI solutions with secure authentication, relational database management, and cloud hosting. Solid foundation in Object-Oriented Programming (OOP), DBMS, and troubleshooting, seeking an entry-level technical role across software engineering, systems, or IT technology domains.

## CORE SKILLS

|                                 |                                                                                             |
|---------------------------------|---------------------------------------------------------------------------------------------|
| <b>Programming:</b>             | Python, Java, SQL, JavaScript, HTML5, CSS3                                                  |
| <b>Frameworks &amp; Libs:</b>   | Django, Django REST Framework (DRF), React, React Native, Tailwind CSS                      |
| <b>Databases &amp; Caching:</b> | PostgreSQL, Supabase, MySQL, SQLite, In-Memory Caching                                      |
| <b>Platforms &amp; Tools:</b>   | Git, GitHub, Render, Linux, Windows, Hugging Face API, LangChain, Tesseract OCR, pgvector   |
| <b>Core Concepts:</b>           | Object-Oriented Programming (OOP), Relational DBMS, REST APIs, System Deployment, Debugging |

## PROJECT EXPERIENCE

### Narendra Kirana — Cross-Platform Retail & Delivery Platform

Tech Stack: Python, Django, Django REST Framework, PostgreSQL, React Native, React, Tailwind CSS

- Developed a cross-platform commerce system to digitize operations for a local grocery business and startup venture, connecting customers, store management, and delivery partners.
- Built a customer mobile app in React Native alongside an owner dashboard and delivery portal powered by Django REST APIs.
- Used Django ORM to write efficient database queries for product inventories and order histories, utilizing caching to ensure fast loading times.
- Engineered an end-to-end local delivery dispatch workflow with real-time status updates and secure transaction handling.

### Parikshon AI — AI Document Learning & Quiz Platform

Tech Stack: Python, Django, PostgreSQL, pgvector, Hugging Face, LangChain, Tesseract OCR

- Developed a web application that allows students to upload study notes and get instant answers and AI-generated quizzes from their documents.
- Integrated Tesseract OCR to extract text from images and scanned PDFs, splitting content using LangChain.
- Implemented semantic search using pgvector embeddings to retrieve relevant answers based on user questions.
- Built user login, guest usage limits, and chat history management; deployed live application on Render.

### Personal Portfolio Website

Tech Stack: HTML5, CSS3, JavaScript

- Created a responsive personal website to display projects, technical skills, and contact links.
- Ensured smooth layout compatibility across mobile, tablet, and desktop screens.

## EDUCATION

### Master of Computer Applications (MCA)

RV Institute of Technology, India

June 2026

### Bachelor of Computer Applications (BCA)

Bapatla College of Arts and Sciences, Bapatla, India

April 2024

## CERTIFICATIONS & LEARNING

Google Prompting Essentials • Google AI Essentials • Introduction to Generative AI — Google Cloud • AI Upskilling: Technical Foundations — Qualcomm Academy (In Progress)
